
seq 3 oyster_id28_ch5_1394131s: the recording's cycles; black = the oscillatory FHN fit
recorded cycles in delay coordinates, coloured by cycle phase (hsv)
paper's delay: delta = 24 s = 0.101 model units
quarter cycle: delta = 658 s = 2.76 model units
fitted FHN, mapped to mV
V(t), mV (detrended)
V(t - delta), mV (detrended)
