
seq 7 oyster_id35_ch15_288397s: the recording's cycles; black = the oscillatory FHN fit
recorded cycles in delay coordinates, coloured by cycle phase (hsv)
paper's delay: delta = 1 s = 0.0716 model units
quarter cycle: delta = 33 s = 2.36 model units
fitted FHN, mapped to mV
V(t), mV (detrended)
V(t - delta), mV (detrended)
